45LSSBD Biltong Dryer.

This is the smallest food processing unit in our range of dryers and is designed for home use, generally producing approximately 5 kg` s of dried meat (Biltong) in 2 to 3 days depending on the climate. An extraction fan in the roof of the cabinet extracts humid air from within to aid in the drying process. The extracted air is replaced by clean air drawn in through replaceable filtered air vents. Meat is hung from round bars in the top of the biltong dryer with supplied hooks. In times of cold climate conditions, a heating element can be used and is located in the base of the unit below the drip tray.

Height	510 mm
Width	300 mm
Length	400 mm
Weight	10.6 kg
KW, HP, Amps	1Amp 40 Watts
Power Source	240 Volts
Material	Stainless Steel
Product Finish	Brushed Stainless Steel
Capacity	Approx. 5 kg of meat every 2 - 3 days
Comes with	Tray hooks & Biltong spices
	Knocked down format / Fully Assembled
